Executive Summary

UI/UX Recommendations

Strategic recommendations

Phased Rollout

arya.ag

India’s largest full-stack agri-commerce platform

CORE TARGET SEGMENTS

Individual farmers, Farmer Producer Organizations (FPOs) and Smaller Traders

OFFERINGS

Warehouse booking, Inventory management, Commodity Finance and Digital trading

PAIN POINT

- Actual penetration
- Consistent engagement among users

PROBLEM STATEMENT

- 📱 **Low active usage** of Arya.ag app among Farmers, FPOs & Local Traders
- ⚙️ **Complex app navigation + unclear value** → quick drop-offs after install
- 🗣️ **Low digital literacy** & reliance on verbal/WhatsApp guidance
- 🌾 **Ground realities** like phone-sharing & patchy connectivity not fully supported
- 🤝 **Trust** still anchored in offline agents, not the digital experience

This blocks Arya.ag from achieving scale, efficient delivery & data-driven insights

📍 Different users = Different digital realities

Persona	Digital Maturity	Key Challenges	What They Need Most
🧑 Farmers	Low	- Limited smartphone/app exposure - Vernacular dependency - Trust gap with digital platforms	Guidance + Trust + Zero-effort experience
👥 FPO Leadership	Medium	- Manual data handling (WhatsApp/Excel) - Aggregation & compliance workload - Low visibility into member operations	Control + Coordination + Simplified workflows
🧑 Local Traders (SME)	High	- Slow transactions - Quality & logistics uncertainty - Price transparency pressure	Speed + Reliability + Assurance

VISION STATEMENT

To make the **Arya.ag application indispensable to the daily operations** of farmers, FPOs and smaller traders by driving consistent adoption, trust and digital engagement, enabling deeper market penetration, efficient service delivery and data-driven value creation.

User Segment Pain Point & App Opportunity Matrix

Persona	Core Motivations	Observed Behaviours (from field stories & videos)	Deep Pain Points (Functional + Emotional)	High-Impact App Opportunities (Arya-specific)
1. Ramayya – Smallholder Farmer	- Earn fair income - Avoid distress sale - Transparency & trust - Real-time guidance	- Relies on neighbours & WhatsApp messages/voice notes - Low digital literacy - Trusts field agents > apps - Makes decisions based on urgency	Functional: - No hyperlocal mandi intel - Unaware when to sell - Confusing loan terms - No visibility of stored stock Emotional: - Fear of fraud / hidden deductions - Anxiety around moisture/quality tests	- Zero-Click Farmer Dashboard - Hyperlocal mandi/weather/pest alerts “Best Time to Sell” AI advisor - Voice-first selling (“Sell 2 quintal”) - Live weightment + moisture video proof - WhatsApp integrated trust workflows
2. Kamala Didi – Community Resource Person (CRP) Outreach Worker	- Empower farmers - Build FPO credibility - Demonstrate success - Simplify education	- Conducts village meetings - Uses pamphlets + WhatsApp videos - Tracks farmers manually - Relies on scripts + memory	Functional: - No tools to demonstrate value - Hard to explain storage/pledge finance - Manual onboarding & KYC Emotional: - Pressure to mobilize farmers - Needs validation & trust from villagers	- CRP Toolkit (videos, scripts, checklists) - Simple KYC OCR workflow - Training library in vernacular - Village visit planner - Farmer onboarding wizard - Aggregation status tool
3. Ranjit – FPO CEO	- Increase FPO turnover - Serve member farmers - Build institutional brand - Improve compliance	- Coordinates CRPs - Uses spreadsheets/WhatsApp - Manages accounts manually - Handles aggregation via calls	Functional: - No forecast of member harvest - Complex reporting & compliance - Hard to coordinate logistics - Data fragmentation Emotional: - Pressure to deliver results - Frustration with manual processes	- FPO Command Center Dashboard - Member CRM + crop lifecycle tracking - Harvest prediction tool - Auto-generated compliance reports - Group loan pipeline tracker - Inventory+aggregation workflow
4. Javed – Local Trader (SME)	- Fast, reliable supply - Accurate market intelligence - Stable margins - Verified quality	- Calls 10–20 contacts/day - Uses mandi circles + local intel - Evaluates quality on the spot - Relies on trust-based settlements	Functional: - No central market view - Unpredictable quality - Unreliable logistics - Slow settlement Emotional: - Low trust in sellers - Fear of margin erosion	- Trader Intelligence Hub - Price charts + demand heatmaps - Quality verification cards - Logistics booking + live tracking - Instant escrow settlements - Bulk negotiation tools

PROPOSALS FOR NEW OR ENHANCED FUNCTIONALITIES

Tailored workflows to drive daily adoption, trust and transaction value

1. 🧑🌾 **SMALLHOLDER FARMER**

“Make Arya.ag Simple, Predictive & Voice-First”

- Zero-Click Farmer Dashboard: Hold/Sell signals, mandi vs digital buyer comparison, rainfall + pest alerts, auto loan eligibility.
- Voice Navigation (“Speak to Arya”): Local language commands for prices, selling, advisory.
- WhatsApp Interactive Advisory: Send/query pest images, price alerts, weather risks.
- Smart Release Workflow: Suggest best warehouse, pickup times, demand forecast.

2. 🧑🔧 **CRP OUTREACH WORKER**

“Empower Field Agents”

- CRP Offline Toolkit: Downloadable training videos, scripts, KYC forms, all offline-friendly.
- Farmer Help Queue: Structured list of farmer issues with direct call/WhatsApp/escalate buttons.
- GPS Visit Logging: Auto check-in + performance badges for field visits.
- One-tap Farmer Onboarding: OCR-KYC, simple forms, multilingual support.

3. 🏢 **FPO CEO**

“FPO Command Center”

- FPO Dashboard KPIs: Stock, payments, Quality Check (QC) status, expiry alerts, member activity.
- Bulk Action Tools: Create 100+ release requests, bulk-upload records, auto-generate payment reports.
- FPO Member Broadcasts: Push announcements, price offers, events to all members.
- Stock Intelligence: Predictive expiry alerts, demand indicators, warehouse utilization analytics.

4. 🧑🔧 **TRADERS (SME)**

“Fast Deals, Negotiation, Logistics”

- Trade Desk Matching: Best lots near you, price trends, recommended pickup route.
- Offer Negotiation Engine: Offers, counter-offers, expiry, instant deal confirmation.
- Logistics Tracking: Real-time truck updates, pickup ETA, digital POD.
- Trader Wallet: Instant settlements, invoice downloads, transaction history.

5. 🏢 **CORPORATE PROCUREMENT MANAGER**

“Enterprise Procurement Module”

- Contract Lifecycle Management: Committed vs delivered, delays, QC flags, SLAs.
- Supplier Scorecard: Reliability, quality %, price stability, compliance rating.
- Enterprise RFQ Broadcasting: Bulk RFQs to multiple FPOs/SMEs → compare → finalize.
- QC & Traceability Vault: All lab reports, compliance docs, traceability chain (farm → FPO → truck → mill)

One App. Five Journeys. Zero Cognitive Load.

🌟 Increasing daily usage → unlocking revenue, data & trust

💡 Because “daily usage” = your success metric

Trust → Usage → Value → Network Scale

STRATEGIC RECOMMENDATIONS

Improving user onboarding, digital literacy and ongoing engagement (e.g., localized content, gamification, incentive programs, physical touchpoints)

Pillar	Sub-Recommendation	Description
1. Role-Based Onboarding	1a. Persona-Based Entry Screen	5-user entry: Smallholder Farmer, CRP Outreach Worker, FPO CEO, Local Trader (SME), Corporate Procurement Manager. Each directed into a personalized flow.
	1b. Guided Onboarding Flows	Tailored dashboards: Farmers → Zero-Click Dashboard; CRP → Field Toolkit; FPO → Command Center; Trader → Buying Desk; Corporate → Procurement Suite.
	1c. Assisted & WhatsApp Onboarding	CRP-led field onboarding + WhatsApp conversational flow for KYC, price checks, and account setup. Boosts trust and adoption in rural areas.
2. Digital Literacy Enablement	2a. Localization & Voice Navigation	Multi-language UI (HI/KA/MR/GU/TL) + voice commands (“Price batao”, “Release stock”). Reduces literacy barriers.
	2b. Icon-First Visual System	Weather, pest, price trends, stock, QC shown using intuitive icons for easy comprehension.
	2c. 10-Second Micro-Learning + Community Forum	Short visual tutorials + peer Q&A forum for farmers and CRPs. Enables continuous learning and confidence building.
3. Engagement & Retention Engine	3a. Gamification (“Arya Score”)	Points and badges for productive behaviors: storage, repayments, CRP visits, trader reliability, FPO compliance.
	3b. Incentives & Rewards	QC rebates, storage discounts, trader fee benefits, CRP performance bonuses. Reinforces habit loops.
	3c. Smart Personalized Alerts	Precision alerts: price spikes, weather risk, QC expiry, logistics ETA, Request for Quotation (RFQs), farmer help requests.
4. Phygital Touchpoints	4a. Village Digital Kiosks	CRP-managed kiosks for price checks, storage booking, loan eligibility bridging offline & online.
	4b. Arya Mandi Days (Monthly Events)	On-ground demonstrations, loan camps, buyer–seller meetings, farmer training sessions. Builds trust & awareness.
	4c. QR-Integrated Offline Receipts	Warehouse slips with QR linking to digital stock page → seamless offline → online verification.

ENGAGEMENT ENGINE ACROSS THE WHOLE FUNNEL

Funnel Stage	Strategic Recommendation	Expected Outcome
Awareness	Physical CRP campaigns, Mandi Days	More new users
Activation	Role-based onboarding, WhatsApp flows	Faster onboarding
Adoption	Micro-learning, community forum	Higher digital comfort
Retention	Personalized alerts, reliability scores	Daily/Weekly usage
Advocacy	Referral rewards (Farmer & CRP tiers)	Organic growth

VOICE OF THE USER : FIELD RESEARCH SUMMARY

Critical User Insight	% Users (n=30)	Earlier Arya App	How Redesigned Arya Fixes It
“App should be simple, vernacular language-first like WhatsApp/PhonePe.”	80%	Crowded tiles, English-heavy UI, too many steps.	Zero-click home, big icons, Kannada toggle, voice-first UI.
“Apps like DeHaat and Ninjacart show advisory, weather, clear cards, and tracking Arya should guide us the same way.”	63%	Advisory hidden, no weather+price bundle, no logistics visibility.	Unified dashboard: price trends, advisory cards, weather, stored value, loan eligibility + truck ETA & contract stages.
“CRP/field support is essential even DeHaat and StarAgri rely on people, not apps alone.”	90%	No CRP workflows, no offline support, no task view.	CRP Task Dashboard, Offline Toolkit, Help Queue, WhatsApp support.

PHASED ROADMAP FOR ADOPTION & ENGAGEMENT

📌 PHASE 1: FOUNDATIONAL (0–90 DAYS)

Focus: Onboarding + UI Fix + Role-Based Setup

Key Initiatives

- Role-Based Onboarding: 5-user entry → route to correct dashboard
- Zero-Click Dashboards: Hold/Sell signals, prices, weather, CRP tasks
- Localization + Voice (Lite): 3 languages + simple commands
- WhatsApp Onboarding (MVP): Alerts + CRP-assisted setup
- FPO CEO Snapshot: Basic stock, QC, payment alerts
- UI/UX Cleanup: Unified design, above-the-fold layout

Expected Outcomes

- ➡ Higher activation (30–50%)
- ➡ Reduced drop-offs
- ➡ Lower complexity
- ➡ Increased trust

Phase 1 Summary

Strong foundation + simplified, role-specific app

⚡ PHASE 2: GROWTH & ENGAGEMENT (90–180 DAYS)

Focus: Engagement + Transactions + Digital Literacy

Key Initiatives:

- Gamification (Arya Score): Points for farmers, CRPs, traders, corporates
- Advisory + Community Forum: Micro-learning + Expert Q&A
- Smart Notification Engine: Weather, QC, RFQs, logistics alerts
- CRP Offline Toolkit: Offline KYC, forms, auto-sync
- Trader Buying Desk: Offer → Counter-offer + pickup optimization
- Corporate Suite (v1): Scorecards, KPIs, compliance vault

Expected Outcomes

- ➡ Higher daily app use
- ➡ Better digital literacy
- ➡ Increased transactions
- ➡ More corporate trust

Phase 2 Summary

High engagement + transaction flywheel activated

🧠 PHASE 3: SCALING & INTELLIGENCE (6–12 MONTHS)

Focus: Intelligence + Automation + Enterprise Scale

Key Initiatives

- Predictive Analytics: Price & demand forecasting
- Unified Document Vault: QC, WRF, invoices, contracts + QR
- Enterprise Procurement Suite: RFQs + lifecycle automation
- Logistics System: Real-time tracking & digital POD
- Phygital Network Expansion: CRP kiosks, FPO hubs, Mandi Days
- Multi-Language Expansion: Gujarati, Telugu, Bengali, Odia

Expected Outcomes

- ➡ Intelligent, audit-ready platform
- ➡ Faster supply chain
- ➡ Rural + national scale adoption

Phase 3 Summary

Predictive, automated, enterprise-grade grain commerce platform

Industry: Arya.ag operates in **India’s post-harvest grain value chain**. This industry has high inefficiencies, weak price discovery, and massive value leakage setting up a classic “bad industry” with structural profit traps unless a player rewires the system.

Arya.ag succeeds in a structurally unattractive industry by changing the industry structure itself bundling storage, credit, and commerce to neutralize high buyer power and intense rivalry, creating a defensible, trust-led grain operating system. This raises switching costs, increases buyer trust through QC and traceability, ensures fulfilment reliability, and produces a defensible data flywheel.

Let’s rewrite India’s grain story together.

Bring all stakeholders onto the platform that empowers farmers, accelerates FPOs, and modernises trade. Join Arya.ag in creating the most trusted, digital backbone of rural India.

WHAT ENABLES ARYA.AG TO WIN: MARKET FORCES & STRATEGIC ADVANTAGES

Force	Level	Key Drivers (Simplified)	Arya.ag Advantage
Threat of New Entrants	Low	• Informal market dominance • Capital + regulatory barriers • Hard to build trust & infra	Full-stack “SAP for Grain” → high switching costs, trust moat
Bargaining Power of Suppliers (Warehouses, logistics)	Low	• Highly fragmented warehouses • Standard QC protocols • Easy supplier onboarding	Controls digital layer → scalable footprint, low dependency
Bargaining Power of Buyers (Corporates, traders)	High	• Undifferentiated grain = easy switching • High procurement volumes• Price-led negotiations	Shifts competition from price → trust via QC & fulfilment
Threat of Substitutes (Mandis, informal agents)	Low	• Mandis remain dominant • Informal aggregators give instant cash	Superior bundle: quality, traceability, logistics + finance
Rivalry Among Competitors (280+ agri startups)	High	• Price wars; fast procurement • Low differentiation in marketplaces	Profitable full-stack model → workflow control + insulation
